About Me

A passionate MERN Stack developer who is always looking for exciting experiences. Expert at JavaScript, React JS and its Libraries, Node JS, Express JS, and MongoDB. Loves to build websites and handle errors.

Skills

- **Expert At-** HTML5, CSS3, JavaScript, ES6, Bootstrap, React.js, React Router, React Bootstrap, React Hook Form, Node.js, Express.js, MongoDB, Firebase Authentication, Rest APIs.
- **Comfortable With-** Material UI, Redux.js, Python, JSON, OOP.
- **Familiar With-** TypeScript, Stripe, Google Map, React Spring, React Native, SASS.
- **Tools:** VS Code, Chrome Dev Tool, Postman, Git, Github, NPM, Firebase, Heroku, Netlify, Windows.

Projects

1. Zamzam International: (Full-stack Visa Service Agency website, April 2021)

- o This is a Visa Agency Website. Registered visa appliers can pay with their credit cards for booking a visa and give a review to the company that is added to the website. Admins can add a new visa service or a new admin, delete an existing one, and edit orders that are placed by the users. Responsive on mobile and laptop.
- o **Tools:**
  - ➢ Front-end: React.js, React Router, React-Bootstrap, React Hook Form, Bootstrap, Stripe Payment Method, Firebase, Firebase Authentication system.
  - ➢ Back-end: Node.js, Express.js, MongoDB, Heroku.
- o **Live Website: https://complete-website-3.web.app/**
- o **Github Code:**
  - ✓ **Client-side : https://github.com/Lamisa-zamzam/zamzam-international**
  - ✓ **Server-side: https://github.com/Lamisa-zamzam/zamzam-international-server**

2. Zamzam's Collection: (Full-stack jersey selling website; April 2021)

> This is a full-stack website where authenticated users can buy a product and see their orders. Admins can add, edit and delete products. It contains a special search feature to easily find the jersey wanted. Responsive on mobiles and tablets alongside laptops.
>
> - **Tools:**
>   - Front-end: React JS, React Router, React-Bootstrap, React Hook Form, Bootstrap, Stripe Payment Method, Firebase, Firebase authentication system, Material UI.
>   - Back-end: Node.js, Express.js, MongoDB, Heroku.
> - **Live Website: https://full-stack-sport-grocery.web.app/**
> - **Github Code:**
>   - ✓ **Client-side : https://github.com/Lamisa-zamzam/zamzams-collection**
>   - ✓ **Server-side: https://github.com/Lamisa-zamzam/zamzams-collection-server**

3. Globetrotter: (Ride Booking Website; March 2021)

> - This responsive project provides users with several ways to travel around the city. Authenticated Users can specify where they want to go from a place and the date on which they want to travel and then see the rides available for that date and place.
> - **Tools:**
>   React JS, React Router, React-Bootstrap, React Hook Form, Firebase, Firebase Authentication System.
> - **Live Website: https://react-auth-3.web.app/**
> - **Github Code: https://github.com/Lamisa-zamzam/globetrotter**
